Loxon®

WATER REPELLANTS

ASK HOW TO PROTECT CONCRETE AND MASONRY FROM CHLORIDE AND MOISTURE.

ASK HOW TO GET COMPLETE PROTECTION THAT'S COMPLETELY INVISIBLE.

Looking to protect your masonry and concrete structures from chloride attack and wind-driven rain? Look no further than Loxon Water Repellants. Engineered for large commercial projects, these easy-to-apply waterproofers penetrate concrete and masonry to provide maximum protection and durability. Both Loxon 40% Silane and Loxon 7% Siloxane feature a transparent, no-sheen finish for maintaining a natural, uncoated look. Plus, they will not mar glass or flashing for minimal prep and clean-up.

Loxon 40% Silane Vertical Water Repellant – now VOC Compliant.

When the job calls for complete protection from water, you need Loxon 40% Silane Water Repellant. This premium, high-performance transparent coating penetrates concrete and masonry surfaces to seal out moisture and chloride. And it's low in VOCs, making it ideal for protecting the environment, too.

For low impact on the environment – and your budget – choose Loxon 7% Siloxane Vertical Water Repellant.

Loxon 7% Siloxane Vertical Water Repellant is a hard-working sealer at an economical price. This product meets ASTM repellency standards. And with zero VOCs, it also meets strict environmental standards for VOC compliance.

LOXON WATER REPELLANTS DELIVER WHERE IT COUNTS

- Ideal for large commercial masonry and concrete structures
- Protect against wind-driven rain and chloride attack
- Will not mar glass or flashing for minimal prep and clean-up
- Meet ASTM standards for water repellency
- Conveniently available at local Sherwin-Williams stores

ASK FOR PROVEN PERFORMANCE, TECHNICAL SUPPORT AND LOCAL SERVICE.

With over 3300 stores and 1600 sales representatives across North America, Sherwin-Williams is uniquely positioned to help you on the job from start to finish.
