

High Performance Archite

1 Pro Industrial 0 VOC Acrylic

An ambient cured, single component acrylic coating designed for interior and exterior industrial and commercial applications.

- Zero VOCs for environmental compliance
- Low-odor, fast-dry formula is ideal for occupied spaces
- Perfect for applications requiring a durable finish with early moisture resistance
- Single-component package requires no mixing or measuring in the field

- Chemical resistant
- Superior color and gloss retention
- Flash rust and early rust resistance
- HAPS free
- Available in gloss or semi-gloss

2 Pro Industrial Industrial Enamel 100

A high solids, less than 100 g/l VOC, alkyd, gloss topcoat intended for interior/exterior use in industrial and commercial applications.

- All-purpose, HAPs-free enamel for interior and exterior applications
- VOC-compliant for environmentally restricted areas
- High-solids formula delivers twice the coverage per gallon and requires less paint

- Easy to apply by brush, roll or spray
- Chip and flake resistant
- Great for handrails, machinery, safety and pipe marking

3 Pro Industrial Multi-Surface Acrylic

A waterborne acrylic gloss for interior and exterior use on marginally prepared metal or masonry surfaces. Features gloss, fast dry, easy application and dryfall properties.

- High hiding with excellent stain-blocking
- Great for crowded warehouses with hard-to-clean walls and ceilings
- Requires minimal surface prep – adhering well to marginally prepared surfaces
- Optimal dryfall characteristics keep overspray and spattering to a minimum
- Acrylic coating

4 Pro Industrial Pro-Cryl Universal Acrylic Primer

An advanced technology, self cross-linking acrylic primer. A fast-dry, corrosion resistant coating for both new construction and maintenance applications.

Structural Coatings

- Single-component, rust-inhibitive primer for iron, steel and aluminum
- Recommended when a corrosion-resistant primer is required
- VOC compliant
- Can be used as a primer under waterbased or solvent-based high performance topcoats
- Great alternative to conventional solvent-based primers
- Accepts all topcoats – including hot-solvent urethanes and epoxies
- Flash rust/early rust resistant
- Available in red-oxide, gray and off-white

5 Pro Industrial Precatalyzed Waterbased Epoxy

Single-component, waterbased formula allows you to deliver the look your customers want on time and on budget.

- Single-component, waterbased formula
- Exceptional durability and washability
- Chemical and impact resistant
- Excellent hide and coverage
- No mixing, measuring or limited pot life
- Suitable for properly prepared interior wood, metal, drywall, masonry and concrete
- Available in eg-shel and semi-gloss

6 Pro Industrial High Performance Epoxy

Hard-working epoxy; high gloss and low VOCs.

- General-purpose epoxy with high gloss, low VOCs and 80% volume solids
- Ideal for industrial and high-performance commercial applications
- Provides excellent chemical and abrasion resistance
- Applies easily to walls, floors and equipment

7 Pro Industrial Hi-Bild Waterbased Catalyzed Epoxy

Engineered for surfaces where performance and durability are most essential. Meets the demands of high maintenance, high traffic commercial and institutional settings. High film build capacity gives it a durable, tile-like finish; low VOC and low odor make it safe for interior or exterior application.

- Up to 6 mils dry in one coat
- High performance with excellent durability
- Low VOC (less than 250 g/l)
- Low odor and resists yellowing
- Chemical and abrasion resistant
- Repels moisture
- Impact resistant
- High or low luster finishes **PPC**
