## WATERBASED INDUSTRIAL ENAMEL

### PERFORMANCE YOU CAN COUNT ON.

With WaterBased Industrial Enamel, you can finally achieve the high performance of a solvent-based alkyd in a water-based formula. It offers a durable, high gloss finish that is available and comes in a wide range of colors. WaterBased Industrial Enamel is an all-purpose maintenance enamel, as well as an advanced coating for new construction. Your facility will benefit from these features:

- Outstanding exterior durability
- Flash rust, early rust resistance
- Early moisture resistance gives better final appearance
- Suitable for USDA inspected facilities
- High gloss for durable, chip resistant finish
- Cleans up easily with water
- Three-year shelf life improves inventory flexibility
- Non-flammable: eliminates storage and shipping restrictions
- Fast dry
- Low-odor
- HAPS free
- Low-VOC

### GOES ON EASY. STAYS TOUGH.

WaterBased Industrial Enamel is a one-component, acrylic-modified alkyd that can be applied with brush, roller or spray. It goes on easily and offers outstanding exterior performance properties. Designed for use on a variety of prepared substrates including steel, concrete, galvanized metal, masonry and aluminum, WaterBased Industrial Enamel is ideal for storage tanks, rolling stock, piping and machinery.

### PROFESSIONAL SERVICES ADD UP TO REAL VALUE.

You get more per gallon from Sherwin-Williams. More technical expertise. More services to help professionals like you increase your productivity.

We offer the industry's broadest range of high-performance coatings and application equipment, an expert staff of coatings specialists and the industry's largest distribution network. Our experienced service and technology team offers specification advice, color consulting and on-site assistance.
