ProMar 200 Zero VOC Interior Latex Primer is a durable, professional quality, interior vinyl acrylic primer.

This primer has been designed for use with the ProMar Series Interior Latex topcoats providing a complete system.

For use on these interior surfaces:
- Wood
- Drywall
- Plaster
- Masonry
- Primed Metal
- Previously painted surfaces

**DESCRIPTION**

**COLOR:** White

**COVERAGE:** 350 - 400 sq ft/gal @ 4 mils wet; 1.0 mils dry

**DRYING TIME, @ 77°F, 50% RH:**
- Touch: 1 hour
- Recoat: 4 hours

Drying and recoat times are temperature, humidity and film thickness dependent.

**FLASH POINT:** N/A

**FINISH:** 0 - 5 units @ 85°

**VEHICLE TYPE:** Vinyl Acrylic

**B28W02600**

**VOC (less exempt solvents):**
- <50 g/L; <0.42 lb/gal

As per 40 CFR 59.406 and SOR/2009-264, s.12

**VOLUME SOLIDS:** 26 ± 2%

**WEIGHT SOLIDS:** 43 ± 2%

**WEIGHT PER GALLON:** 10.77 lb

**WVP PERMS (US):** 25.8 grains/(hr ft² in Hg)

**TINTING**

Requires ColorCast Ecotoners for tinting. For best topcoat color development, use the recommended "P"-shade primer. If desired, up to 4 oz per gallon of ColorCast Ecotoners can be used to approximate the topcoat color. Check color before use.

When spot priming on some surfaces, a non-uniform appearance of the final coat may result, due to differences in holdout between primed and unprimed areas. To avoid this, prime the entire surface rather than spot priming.

For optimal performance, this primer must be topcoated with a latex, alkyd/oil, water based epoxy, or solvent based epoxy coating on architectural applications.

**GREENGUARD PRODUCT CERTIFIED FOR LOW CHEMICAL EMISSIONS UL.COM/GG UL 2818 GOLD**

**SURFACE PREPARATION**

**WARNING!** Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

**CAULKING**

Fill gaps between walls, ceilings, crown moldings, and other trim with the appropriate caulk after priming the surface.

**DRYWALL**

Fill cracks and holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

<tr>
<th>SURFACE PREPARATION</th>
<th>APPLICATION</th>
<th>CAUTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Masonry, Concrete, Cement, Block</td>
<td>Brush Use at temperatures above 50°F. No reduction necessary.</td>
<td>For interior use only. Protect from freezing. Non-photochemically reactive. Not for use under wallpaper.</td>
</tr>
<tr>
<td></td>
<td>Roller Use a synthetic nap cover</td>
<td>Before using, carefully read CAUTIONS on label.</td>
</tr>
<tr>
<td></td>
<td>Spray - Airless Pressure 2000 psi Tip 0.017&quot;-.021&quot;</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>CLEANUP INFORMATION</strong></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Clean spills, spatters, hands and tools immediately after use with soap and warm water. After cleaning, flush spray equipment with a compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer’s safety recommendations when using solvents.</td>
<td></td>
</tr>
<tr>
<td>Mildew</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised. Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Plaster</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.</td>
<td></td>
<td></td>
