QUICK DRY
Interior/Exterior Latex
Stain Blocking Primer
B51W08670

CHARACTERISTICS

Color: White
Coverage: 350 - 400 sq ft/gal @ 4 mils wet; 1.1 mils dry
Drying Time, @ 77°F, 50% RH:
  Touch: 30 minutes
  Recoat as a primer: 1 hour
  Recoat as a stain sealer: 4 hours
Finish: 0-5 units @ 85°
Flash Point: N/A
Vehicle Type: Vinyl Acrylic
B51W08670
VOC (less exempt solvents): <50 g/L; <0.42 lb/gal
As per 40 CFR 59.406 and SOR/2009-264, s.12
Volume Solids: 29 ± 2%
Weight Solids: 43 ± 2%
Weight per Gallon: 10.4 lb

Tinting
Requires ColorCast Ecotoners for tinting.
For best topcoat color development, use the recommended "P"-shade primer. If desired, up to 4 oz per gallon of ColorCast Ecotoners can be used to approximate the topcoat color. Check color before use.

When spot priming on some surfaces, a non-uniform appearance of the final coat may result, due to differences in holdout between primed and unprimed areas. To avoid this, prime the entire surface rather than spot priming.

For optimal performance, this primer must be topcoated with a latex, alkyd/oil, water based epoxy, or solvent based epoxy coating on architectural applications.

For exterior exposure, this primer must be topcoated within 14 days with architectural latex or oil finishes.

For better performance when priming an entire house, use Exterior Latex or Oil-Based Primers.

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Drywall - Fill cracks and nail holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry & Concrete
All new surfaces must be cured according to the supplier’s recommendations, usually about 30 days. Remove all form release and curing agents. Masonry surfaces must be dry before priming. Moisture content must be 15% or lower and the pH between 6 and 9. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

### APPLICATION

**Plaster**  
Apply at temperatures above 50°F.  
No reduction necessary.  
Do not thin when used for stain blocking.

- **Brush**  
  Use a nylon/polyester brush

- **Roller**  
  Use a 1/4" - 3/4" nap synthetic cover

- **Airless Spray**  
  Pressure: 2000 psi  
  Tip: 0.017" - 0.021"

### CLEANUP INFORMATION

Clean spills, spatters, hands and tools immediately after use with soap and warm water. After cleaning, flush spray equipment with a compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer’s safety recommendations when using solvents.

### CAUTIONS

- Protect from freezing.  
- Non-photochemically reactive.  
- Not for use under wallpaper.  
- Not for use on vinyl or other plastic surfaces.

Before using, carefully read CAUTIONS on label.
