Emerald®
Interior Latex Matte
K36 Series

CHARACTERISTICS
Emerald Interior Acrylic Latex is our “Best-In-Class” interior architectural coating.
Premium performance in washability, stain resistance, block resistance, adhesion, burnish and hiding.
Antimicrobial properties* 
Can only be tinted with CCE Colorants

Color: Most Colors
To optimize hide and color development, always use the recommended P-Shade primer

Coverage: 350 - 400 sq. ft. per gallon @ 4 mils wet; 1.6 mils dry

Drying Time, @ 77°F, 50% RH:
Touch: 1 Hour
Recoat: 4 Hours
Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 0-5 units @ 85°

Tinting with CCE only:
Base: oz/gal: Strength:
High Ref White 0-6 SherColor
Extra White 0-7 SherColor
Deep Base 4-14 SherColor
Ultradeep Base 10-14 SherColor
Accent Base 18-20 SherColor

Extra White K36W00451 (may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs, per gallon
As per 40 CFR 59.406

Volume Solids: 41 ± 2%
Weight Solids: 56 ± 2%
Weight per Gallon: 11.22 lbs
Flash Point: N/A
Vehicle Type: Styrene Acrylic
Shelf Life: 36 months unopened

APPLICATION
Apply at temperatures above 50°F. No reduction needed.

Brush:
Use a nylon/polyester brush.

Roller:
For best final appearance when rolling, finish off in one direction, especially for dark colors.
Use a high quality polyester roller cover.

Spray—Airless
Pressure 2000 p.s.i.
Tip .017-.021 inch

APPLICATION TIPS
Make sure product is completely agitated (mechanically or manually) before use.

Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

COMPLIANCE
As of 08/26/2019, Complies with:

OTC Yes
OTC Phase II Yes
SCAQMD Yes
CARB Yes
CARB SCM 2007 Yes
Canada Yes
LEEDv4 & v4.1 Emissions Yes
LEEDv4 & v4.1 V.O.C. Yes
EPD-NSF Certified Yes
MIR-Product Lens Certified Yes
MPI Yes

SPECIFICATIONS
Emerald Interior Latex can be used directly over existing coatings, bare drywall, or plaster (cured with a pH of less than 9)

Drywall:
Self-prime using 2 coats of Emerald Interior Latex or 1 coat Premium Wall and Wood Primer 2 coats Emerald Interior Latex

Masonry / Block: (can be filled to provide a smooth surface or primed if it is a high pH substrate)
1 coat Loxon Acrylic Block Surfacer or 1 coat Loxon Concrete & Masonry Primer 2 coats Emerald Interior Latex

Plaster:
Self-prime using 2 coats of Emerald Interior Latex or 1 coat Premium Wall and Wood Primer 2 coats Emerald Interior Latex

Wood:
1 coat Premium Wall and Wood Primer 2 coats Emerald Interior Latex

If the wood has bleeding (such as tannin or knot-holes), prime with Multi-Purpose Primer.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

*Anti-microbial
This product contains agents which inhibit the growth of mold and mildew on the surface of this paint film.
SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking:
Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:
Fill cracks and holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:
All new surfaces must be cured according to the supplier’s recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

CAUTIONS

For interior use only.
Protect from freezing.
Non-photochemically reactive.

Before using, carefully read CAUTIONS on label

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (NIOSH approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. FIRST AID: In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately, WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.

CLEANUP INFORMATION

Clean spills, spatters, hands and tools immediately after use with soap and warm water. After cleaning, flush spray equipment with compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer’s safety recommendations when using solvents.
