# PrepRite®

## Interior/Exterior Latex Block Filler

**B25W25**

### SPECIFICATION

**Masonry, Concrete, Cement, Block**
- 1 ct. PrepRite Block Filler
- 2 cts. Appropriate topcoat

**Recommended Architectural Topcoats**
- A-100 Exterior Latex
- Loxon Acrylic Coating
- SuperPaint Exterior
- Duration Exterior
- Duration Home
- ProClassic Interior
- ProMar Interior
- SuperPaint Interior

**Recommended Industrial Topcoats**
- Pro Industrial DTM Acrylic
- Industrial Enamel
- Metalatex Semi-Gloss
- Water Based Catalyzed Epoxy

Other topcoats may be appropriate.

Industrial topcoats have been tested for interior use only. PrepRite Block Filler has not been tested in environments subject to chemical attack. Any recommendations for use in such areas must follow a thorough evaluation of the effects of the environment on the PrepRite Block Filler and topcoat system.

### SURFACE PREPARATION

#### WARNING!
Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

**Masonry, Concrete, Cement, Block**
Remove all surface contamination, form release agents, moisture curing membranes, etc. by washing with an appropriate cleaner, rinse and allow to dry. Pressure wash the surface if needed. Remove existing peeled or checked paint to a sound surface. Concrete and mortar must be cured, generally 30 days, at 75°F before painting.

Complete removal of sealers, release agents, moisture curing membranes, etc. by washing with an appropriate cleaner, rinse and allow to dry. Pressure wash the surface if needed. Remove existing peeled or checked paint to a sound surface. Concrete and mortar must be cured, generally 30 days, at 75°F before painting.

### CHARACTERISTICS

- Allows topcoat on concrete block to be smooth and uniform
- Effective on above-grade, unpainted masonry surfaces

**Use on unpainted:**
- Masonry
- Concrete
- Cement
- Flat Surfaced Concrete Block

**Color:** Off White
**Coverage:** 75-125 sq ft/gal @ 16 mils wet; 7.7 mils dry

**Drying Time, @ 77°F, 50% RH:**
- Touch: 2 hours
- Recoat with latex based: 18 hours
- Recoat with solvent based: 48 hours

**Flash Point:** N/A
**Finish:** 0-5 units @ 85°
**Vehicle Type:** Vinyl Acrylic

- White B25W00025

**VOC (less exempt solvents):**<br>&lt;50 g/L; &lt;0.42 lb/gal

As per 40 CFR 59.406 and SOR/2009-264, s.12

**Volume Solids:** 48 ± 2%
**Weight Solids:** 68 ± 2%
**Weight per Gallon:** 13.47 lb
**WVP Perms (US):** 53.65 grains/(hr ft² in Hg)

As of 10/30/2017, Complies with:
- OTC Yes
- LEED® 09 NC,CI Yes
- OTC Phase II Yes
- LEED® 09 CS Yes
- SCAQMD Yes
- LEED® 09 H Yes
- CARB Yes
- LEED® v4 Emissions Yes
- CARB SCM2007 Yes
- LEED® v4 VOC Yes
- Canada Yes
- MPI Yes

### SURFACE PREPARATION

**Mildew**  
Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.  
Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

### APPLICATION

<table>
<thead>
<tr>
<th>Method</th>
<th>Temperature</th>
<th>Reduction</th>
<th>Material Preparation</th>
<th>Application</th>
<th>Surface Effects</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Brush</strong></td>
<td>Above 50°F</td>
<td>No reduction</td>
<td>Use a nylon/polyester brush</td>
<td>Apply at the recommended film thickness and spreading rate as indicated on front page. Application of coating below minimum recommended spreading rate may adversely affect the coating system's performance.</td>
<td>Two coats properly applied may be required to provide the most pinhole-free, uniform surface.</td>
</tr>
<tr>
<td><strong>Roller</strong></td>
<td>Use a 3/8&quot; to 1-1/2&quot; nap cover</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Spray - Airless</strong></td>
<td></td>
<td>Reduction up to 1 pt/gal</td>
<td>Remove all in-line and gun filters</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Pressure**: 2300 psi  
**Tip**: 0.028"  
**ProMar Block Filler is ready-to-spray (airless) and does not require thinning.**

### CAUTIONS

- For interior and exterior use.  
- Must be topcoated for exterior use.  
- Protect from freezing.  
- Do not apply to damp or wet surfaces.  
- Do not use below grade as a hydrostatic waterproofer or in immersion service.  
- Before using, carefully read **CAUTIONS** on label.

### CLEANUP INFORMATION

**PROPRIETARY CLEANUP EQUIPMENT:**  
Clean spills and spatters, hands and tools immediately with soap and warm water. After cleaning, flush spray equipment with compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer’s safety recommendations when using solvents.
