**CHARACTERISTICS**

ProMar 200 Zero VOC Interior Latex Low Gloss Eg-Shel is a durable, professional quality, interior vinyl acrylic finish that is perfect for use in areas that require a more scrubbable surface, but where a lower gloss eg-shel finish is desired. It is recommended for use on walls, ceilings, and trim of primed plaster, wallboard, wood, masonry, and primed metal.

**Color:**
- most colors
- To optimize hide and color development, always use the recommended P-Shade primer

**Coverage:**
- 350 - 400 sq ft/gal
- @ 4 mils wet; 1.6 mils dry

**Drying Time, @ 77°F, 50% RH:**
- temperature and humidity dependent
  - Touch: 1 hour
  - Recoat: 4 hours
- Drying and recoat times are temperature, humidity, and film thickness dependent

**Finish:**
- 15-20 units @ 85°<br>  <5 units @ 60°

**Tinting with CCE only:**
- Base oz/gal Strength
  - High Ref White 0-6 SherColor
  - Extra White 0-7 SherColor
  - Deep Base 4-12 SherColor
  - Ultradeep 10-12 SherColor

**APPLICATION**

Apply at temperatures above 50°F. No reduction needed.

**Brush**
- Use a nylon/polyester brush.

**Roller**
- Use a 3/8" - 3/4" nap synthetic cover.

**Spray—Airless**
- Pressure 2000 psi Tip .017"-.021"

**APPLICATION TIPS**

Make sure product is completely agitated (mechanically or manually) before use.

- Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

**SPECIFICATIONS**

**SPECIFICATIONS**

- **Block**
  - 1 ct. ConFlex Block Filler*
  - 2 cts. ProMar 200 Zero VOC Interior Latex

- **Drywall**
  - 1 ct. ProMar 200 Zero VOC Interior Latex Primer
  - 2 cts. ProMar 200 Zero VOC Interior Latex

- **Masonry**
  - 1 ct. Loxon Concrete & Masonry Primer*
  - 2 cts. ProMar 200 Zero VOC Interior Latex

- **Plaster**
  - 1 ct. Premium Wall & Wood Primer*
  - 2 cts. ProMar 200 Zero VOC Interior Latex

- **Wood**
  - 1 ct. Premium Wall & Wood Primer*
  - 2 cts. ProMar 200 Zero VOC Interior Latex

*These primers contain <50 g/L VOCs.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

---

*Anti-microbial
- This product contains agents which inhibit the growth of mold and mildew on the surface of this paint film.
**Surface Preparation**

**Mildew**  
Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Remove before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin.

**Plaster**  
Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.

**Wood**  
Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

**Caulking**  
Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

**Drywall**  
Fill cracks and holes with patching paste or spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

**Masonry, Concrete, Cement, Block**  
All new surfaces must be cured according to the supplier’s recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

**Clean Up Information**  
Clean spills, spatters, hands and tools immediately after use with soap and warm water. After cleaning, flush spray equipment with compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer's safety recommendations when using solvents.
