**SAFETY PRECAUTIONS**

**WARNING!**

- **Chemicals:** Handling or mixing of chemicals may require the use of protective equipment. Always follow the manufacturer’s instructions for safe handling and disposal of chemicals.
- **Storage:** Store paint in a cool, dry place, away from direct sunlight. Do not mix different brands or types of paint.
- **Painting:** Wear appropriate protective clothing and respirators when painting to avoid exposure to harmful fumes. Always work in a well-ventilated area.

**EQUIPMENT:**
- **Spray Guns:** Use a spray gun with a properly fitted filter to prevent clogging and to ensure even coverage.
- **Paintbrushes:** Choose the right paintbrush for the job, ensuring that it is compatible with the type of paint you are using.
- **Paint Trays:** Use a paint tray to catch excess paint and avoid spills.

**CLEANUP:**
- **Paint Removers:** Before painting, remove all surface contamination using a recommended paint remover.
- **Coating Removal:** Use a chemical paint remover to effectively remove old coatings.

**SAFETY ASSURANCE:**
- **Personal Protection:** Always wear appropriate personal protective equipment (PPE) when handling or applying paint.
- **Ventilation:** Ensure proper ventilation in the work area to prevent build-up of harmful fumes.
- **Storage:** Store paint in a cool, dry place, away from direct sunlight, to extend its shelf life.

**RECOMMENDATIONS:**
- **Surface Preparation:** Thoroughly prepare the surface to ensure a quality finish. Follow the manufacturer’s recommendations for surface treatment.
- **Application:** Use the recommended application techniques to achieve the desired finish.
- **Cleanup:** Clean up immediately after use to prevent paint from hardening on equipment.

**CONTINUOUS IMPROVEMENT:**
- **Research:** Continuously research the latest industry trends and innovations to improve product performance.
- **Feedback:** Regularly collect feedback from customers to improve product quality and user experience.

**SUPPORT:**
- **Technical Assistance:** Contact the manufacturer’s customer service team for any questions or issues related to the product.
- **Warranty:** Ensure the warranty is valid and understand the terms and conditions.

**FOR MORE INFORMATION:**
- Visit the manufacturer’s website or contact their customer service for detailed product specifications and application instructions.

<tr>
<th>SURFACE PREPARATION</th>
<th>APPLICATION</th>
<th>CAUTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Masonry, Concrete, Block- All new surfaces must be cured at least 7 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. Repair cracks, voids, and other holes with an elastomeric patch or sealant.</td>
<td>Apply at temperatures above 50°F. No reduction needed. <strong>Brush</strong> Use a nylon/polyester brush. <strong>Roller</strong> Use a 1/4&quot; - 1/2&quot; nap synthetic cover. <strong>Spray—Airless</strong> Pressure: 2000 psi Tip: .015&quot;-.021&quot; Reduction: Up to 1 pint per gallon</td>
<td>Non-photochemically reactive. Protect from freezing. Before using, carefully read <strong>CAUTIONS</strong> on label.</td>
</tr>
<tr>
<td><strong>Plaster</strong>- All new surfaces must be cured at least 7 days. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.</td>
<td>Clean spills, spatters, hands and tools immediately with soap and warm water. After cleaning, flush spray equipment with compliant clean up solvent to prevent rusting of the equipment. Follow manufacturer's safety recommendations when using solvents. Do not pour unused contents down the drain. Consult with local authorities for method of disposal and recycling.</td>
<td></td>
</tr>
<tr>
<td><strong>Vinyl</strong>- Clean the surface thoroughly by scrubbing with warm, soapy water. Rinse thoroughly.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Wood</strong>- Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth. <strong>Exterior</strong>: Knots and some woods, such as redwood and cedar, contain a high amount of tannin, a colored wood extract. If applied to these bare woods, it may show some staining. If staining persists, spot prime severe areas with 1 coat of Exterior Oil-Based Wood Primer prior to using.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Mildew</strong>- Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised. Remove before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Caulking</strong>- Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.</td>
<td></td>
<td></td>
