ALL SURFACE ENAMEL
Interior/Exterior Alkyd
A11 Series

SPECIFICATIONS

Aluminum
1ct. Galvite HS
2cts. All Surface Alkyd Enamel

Drywall, interior
1ct. Premium Wall & Wood Primer
2cts. All Surface Alkyd Enamel

Galvanized Steel
1ct. Galvite HS
2cts. All Surface Alkyd Enamel

Masonry, Concrete, Cement, Block
1ct. PrepRite Block Filler (optional)
Or Loxon Masonry Primer
2cts. All Surface Alkyd Enamel

Plaster
1ct. Loxon Concrete and Masonry Primer
2cts. All Surface Alkyd Enamel

Steel
1ct. All Surface Enamel Primer
2cts. All Surface Alkyd Enamel

Wood, interior
1ct. Premium Wall & Wood Primer
2cts. All Surface Alkyd Enamel

Wood, exterior
1ct. Exterior Oil-Base Wood Primer
2cts. All Surface Alkyd Enamel

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with an appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Aluminum and Galvanized Steel
Wash to remove any oil, grease, or other surface contamination using a water-based cleaner-degreaser. Remove all corrosion with sandpaper, steel wool, or other abrading method.

Drywall
Fill cracks and holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Caulking
Exterior gaps between windows, doors, trim, and other through-wall openings; and interior gaps between walls, ceilings, crown moldings, and other trim can be filled with the appropriate caulk after priming the surface.

CHARACTERISTICS

All Surface Enamel is designed for use on interior and exterior wood, metal, drywall, and other surfaces. This quality coating provides excellent resistance to weather and sunlight. The exceptional durability allows it to be used on doors, trim, windows, and other hard wear areas, including exterior wood floors.

Topcoats
Color: Many Colors
Coverage: 175-225 sq ft/gal @ 4.0 mils wet; 1.7 mils dry
Drying Time, @ 77°F, 50% RH: temperature and humidity dependent
Touch: 1-2 hours
Recoat: 8 hours
Flash Point: 101°F, PMCC
Finish: 80 units @ 60° Satin Black 10-20 units @ 85° Satin Ultradeep 30-40 units @ 85°
Tinting with Blend-A-Color:
Base oz/gal Strength
Tinting White 0-3 75%
Deep Base 3-9 75%
Ultradeep Base 3-9 75%
A11W00201 (may vary by base)

VOC (less exempt solvents): 441 g/L; 3.68 lb/gal
Volume Solids: 43 ± 2%
Weight Solids: 58 ± 2%
Weight per Gallon: 8.76 lb

Primer
Color: White
Coverage: 200 sq ft/gal
Drying Time, @ 77°F, 50% RH: temperature and humidity dependent
Touch: 30 minutes
Topcoat: 1 hour
Flash Point: 87°F, PMCC
A11W00210

VOC (less exempt solvents): 497 g/L; 4.15 lb/gal
Volume Solids: 42 ± 2%
Weight Solids: 63 ± 2%
Weight per Gallon: 11.32 lb
