**SUPERDECK®
Exterior Oil-Based Semi-Transparent Stain
SD4C00125

**DESCRIPTION**

- A penetrating exterior tung and linseed oil-based formula that protects the beauty of wood with a rich semi-transparent stain
- One coat only coverage on most exterior woods
- Scuff-resistant formula with UV protection that resists fading
- Repels water to prevent moisture damage
- This coating contains agents that inhibit the growth of mildew on the surface of this coating.

**Use on wood:**

- Decks
- Doors
- Siding
- Fences
- Shutters
- Shakes
- Outdoor wood
- Furniture

**TIPS:** Stains tend to lap (dark lines where two freshly coated areas overlap). These tips will help avoid lap marks and keep the appearance uniform:

- **Do not apply more than one coat**
- Do not stain in direct sun or on a hot surface.
- Stain from a dry area into the adjoining wet stain area. Stain a board from end to end.
- Keep the leading edge wet and distribute the finish evenly.
- Quickly remove puddles and excess material by redistributing to dry areas or wiping up. Excess product allowed to sit on surface will result in a tacky finish.
- Use natural breaks as boundaries to divide large areas into smaller, more manageable ones.
- Different wood species, textures and natural color will affect finished shade. Always test a small area first for color satisfaction before coating the entire project.

**CHARACTERISTICS**

**Color:** Semi-Transparent Stain colors
A sample brushout is recommended to ensure color satisfaction.

**Coverage:**

- Smooth Wood 250-350 sq ft/gal
- Rough Sawn Lumber 150-250 sq ft/gal
  Depending on porosity and texture

**Drying Time, @ 77°F, 50% RH**

- To touch: 8 hours
- To use: 24 hours

**Flash Point:** 111°F, PMCC

**Finish:**

- No sheen

**Tinting with Blend-A-Color:**

**Vehicle Type:**

- Tung and Linseed oil

**VOC (less exempt solvents):**

As per 40 CFR 59.406 and SOR/2009-264, s.12

| Volume Solids: | 31 ± 2% |
| Weight Solids: | 37 ± 2% |
| Weight per Gallon: | 7.03 lb |

**Surface Preparation**

**WARNING!** Removal of old coatings by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

All surfaces must be clean, dry, and free from dirt, mildew stains, dust and other foreign matter. Do not apply over sealed surfaces. Recognize that any surface preparation short of total removal of the old coating will compromise the service length of the system.

Clean all surfaces completely with the appropriate cleaner based on the conditions.

**SuperDeck Deck Wash**
Mildew stain, Algæae stain
Weathered wood (bleaches wood)
Gray wood (bleaches wood)

**SuperDeck Revive™**
Tannin Bleed, Nail stain
Weathered wood (restores color)
Gray wood (restores color), Mill Glaze

**SuperDeck Stain & Sealer Remover**
Weathered, gray wood
Old Paint & Stain

Carefully follow all label instructions. Thoroughly rinse the surface to remove all residue and allow to thoroughly dry before coating.

To determine if the surface is sealed, test the absorbency of the wood by sprinkling water on the surface. If the water penetrates into the wood quickly, the wood is ready to finish. If the water beads up or does not penetrate, allow the wood to weather 1 to 2 weeks and test for absorbency again.

07/2017 www.sherwin-williams.com continued on back
**APPLICATION**

Thoroughly stir contents before and occasionally during use. For uniformity, mix all cans together before use. Do not thin or mix with any other stains or coatings.

Apply without thinning by brush, roller, pump sprayer or dip. If sprayed, use the lowest possible pressure needed for a reasonable spray pattern. Also, when spraying and dipping, be sure to “back brush/roll”. Back brushing/rolling is suggested when spraying, working the product smoothly and evenly into the wood. This will decrease the possibility of pools or puddles on the surface and ensure a properly penetrated finish.

Penetration will vary depending on porosity and water content of the surface. Thoroughly coat cut ends and joints.

For best results apply in shade with surface temperatures between 40°F and 95°F. Do not apply if temperatures will fall below 40°F or if rain is expected within 24 hours after application. Cooler temperatures require longer drying times.

**COATING SOLUTION**

Which product is the best for my project:

SuperDeck Exterior Waterborne Clear Sealer
- Protects wood from sun while allowing the wood to gray naturally
- Water repellents make water bead up, protecting against cracking, splitting, and warping of wood.
- Leaves a protective coating that resists discoloration caused by mildew.

SuperDeck Exterior Oil Based Transparent
- Lasting, penetrating, oil-based formula
- Enriches wood appearance with a light tone
- UV protection resists graying
- Repels water to prevent moisture damage

SuperDeck Exterior Waterborne Semi-Transparent Deck Stain
- Provides a lasting, mildew-resistant film
- Excellent penetration for protecting horizontal exterior wood surfaces.
- Can be applied to damp surfaces, allowing surfaces to be prepared and stained in one day.

SuperDeck Exterior Oil-Based Semi-Transparent Stain
- A lasting penetrating formula that protects the wood with a rich semi-transparent stain.
- One coat coverage on most woods
- Scuff-resistant formula with UV protection that resists fading.
- Repels water to prevent moisture damage

SuperDeck Waterborne Solid Color Deck Stain
- Waterborne, 100% acrylic resin
- Provides mildew resistant coating
- Use over existing paint or stain
- Can be applied to damp surfaces, allowing surfaces to be prepped and stained in one day.

For more stain information and choices visit www.sherwin-williams.com.

Which product is the best for my project:

For Vertical surfaces - walls, siding, etc, use WoodScapes® Exterior Acrylic Solid Color Stain or WoodScapes® Exterior Polyurethane Semi-Transparent Stain.

**CAUTIONS**

This product must be applied outdoors to wood intended for exterior use only.
- Not for interior use.
- Do not use on roofs.
- Do not varnish or use a clear overcoat.
- Not for use on garage floors, driveways, or automobile traffic areas.

Before using, carefully read **CAUTIONS** on label.

**CLEAN UP INFORMATION**

Clean spills, spatters and tools immediately after use with compliant cleanup solvent. Follow manufacturer's safety recommendations when using solvents.

**DANGER**: Rags, steel wool, other waste soaked with this product, and sanding residue may spontaneously catch fire if improperly discarded. Immediately place rags, steel wool, other waste soaked with this product, and sanding residue in a sealed, water-filled, metal container. Dispose of in accordance with local fire regulations.

The information and recommendations set forth in this Product Data Sheet are based upon tests conducted by or on behalf of The Sherwin-Williams Company. Such information and recommendations set forth herein are subject to change and pertain to the product offered at the time of publication. Consult your Sherwin-Williams representative or visit www.paintdocs.com to obtain the most current version of the PDS and/or an SDS.
