**DESCRIPTION**

SuperDeck® Deck Wash is specifically designed for use on exterior wood and deck surfaces to help remove the discoloration that makes uncoated, weathered surfaces unsightly; and to prepare your deck for application of SuperDeck Stains. With Deck Wash, you can renew weathered surfaces by removing stains caused by mold, mildew, dirt, nails and other pollutants.

**Where to use:**
Use on decks and outdoor furniture made of pressure treated wood, cedar, pine, and most other woods. Not recommended for use on previously painted surfaces. This product is not recommended for redwood or teak. This product is intended for exterior use only.

**Tips:**
Before applying overall, test a sample area, rinse, and let dry to ensure that the results are to your satisfaction. Make sure the surface is completely dry prior to and during application. If the wood is previously damaged due to pressure washing or significant weathering has taken place, the surface may appear fuzzy after application.

**CHARACTERISTICS**
Coverage: Approximately 250 sq. ft/gal. Depending upon the condition and porosity of the wood.

**SURFACE PREPARATION**

Be sure the surface is free of any loose dirt and debris. Thoroughly wet plants and shrubs and cover to protect them from overspray. Uncover promptly after cleaning. Remove all deck furniture and decorative items. Do not allow SuperDeck Deck Wash to come into contact with finished or aluminum surfaces. Rinse immediately after use on metal to avoid pitting or discoloration. Do not allow SuperDeck Deck Wash to come into prolonged contact with clothing, carpet, or fabric, as damage may occur. For best results apply to dry wood.

Plan the application; for horizontal surfaces, work backwards so that you do not walk on the surface being treated. For vertical surfaces, work from the top down. Treat small areas one at a time.

**APPLICATION**

Use at full strength in a well ventilated area. DO NOT MIX WITH ANY OTHER PRODUCT. Apply to the surface with a sprayer or plastic sprinkling can. After applying, let the product sit on the surface for 10 minutes (do not allow Deck Wash to remain on the surface for more than 15 minutes, as an uneven appearance may result). During this time, the product is working to remove the dirt and contamination embedded in the pores of the wood. For stubborn stains, it may be advantageous to scrub with a stiff brush or broom for best results. After 10 minutes, rinse the surface thoroughly with fresh water from a hose, removing all residue. Any residue left on the surface may interfere with the drying or adhesion of topcoats. If topcoating is desired, wait at least 24 hours until the surface is completely dry before applying a product from the SuperDeck Deck Care Family.

**SuperDeck Revive™**
- Tannin Bleed
- Nail stain
- Weathered wood (restores color)
- Gray wood (restores color)
- Mill Glaze

**SuperDeck Stain & Sealer Remover**
- Weathered, gray wood
- Old Paint & Stain
