**WARNING!** Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull.

Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

**Characteristics**

ProMar 200 Zero VOC Interior Latex Flat is a durable, professional quality, washable, interior vinyl acrylic finish for use on walls and ceilings of primed plaster, wallboard, wood, masonry, and primed metal.

**Color:**
Many colors

To optimize hide and color development, always use the recommended P-Shadow primer

**Coverage:**
350 - 400 sq ft/gal

@ 4 mils wet; 1.6 mils dry

**Drying Time, @ 77°F, 50% RH:**

- **Touch:** 1 hour
- **Recoat:** 4 hours

Drying and recoat times are temperature, humidity, and film thickness dependent

**Finish:** 1.5-3.5 units @ 85°

**Flash Point:** N/A

**Tinting with CCE only:**

- **Base oz/gal**
  - Extra White: 0-6

- **Strength**
  - 125%

**Vehicle Type:** Vinyl Acrylic

**Extra White B30W02651**

**VOC (less exempt solvents):** <50 g/L; 0.42 lb/gal

As per 40 CFR 59.406 and SOR/2009-264, s.12

**Volume Solids:** 41 ± 2%

**Weight Solids:** 57 ± 2%

**Weight per Gallon:** 11.75 lb

**WVP Perms (US):** 10.1 grains/(hr ft² in Hg)

**Anti-microbial**

This product contains agents which inhibit the growth of microbes on the surface of this paint film.

**Specifications**

- **Block**
  - 1ct. PrepRite Block Filler*
  - 2cts. ProMar 200 Zero VOC Interior Latex

- **Drywall**
  - 1ct. ProMar 200 Zero VOC Latex Primer
  - 2cts. ProMar 200 Zero VOC Interior Latex

- **Masonry**
  - 1ct. Loxon Concrete & Masonry Primer*
  - 2cts. ProMar 200 Zero VOC Interior Latex

- **Plaster**
  - 1ct. Premium Wall & Wood Primer*
  - 2cts. ProMar 200 Zero VOC Interior Latex

- **Wood**
  - 1ct. Premium Wall & Wood Primer*
  - 2cts. ProMar 200 Zero VOC Interior Latex

* These primers contain <50 g/L VOC.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

**Surface Preparation**

**WARNING!** Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

**Drywall**

Fill cracks and holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

**Masonry, Concrete, Cement, Block**

All new surfaces must be cured according to the supplier’s recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

<th>SURFACE PREPARATION</th>
<th>APPLICATION</th>
<th>CAUTIONS</th>
<th>CLEANUP INFORMATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Plaster</td>
<td>Apply at temperatures above 50°F. No reduction needed. <strong>Brush</strong> Use a nylon/polyester brush. <strong>Roller</strong> Use a 3/8&quot; - 3/4&quot; nap synthetic cover. <strong>Spray—Airless</strong> Pressure ................................ 2000 psi Tip..................................... .017&quot;-.021&quot;</td>
<td><strong>For interior use only</strong> Protect from freezing. Non-photochemically reactive. Before using, carefully read CAUTIONS on label</td>
<td>Clean spills, spatters, hands and tools immediately after use with soap and warm water. After cleaning, flush spray equipment with compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer’s safety recommendations when using solvents.</td>
</tr>
<tr>
<td>Wood</td>
<td>Make sure product is completely agitated (mechanically or manually) before use. Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor. Using the same method of application and batch to touch up with as that originally used will help improve touch up. When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Mildew</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Caution and alternative cleaning solutions may be advised. Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Caulking</td>
<td>Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.</td>
<td></td>
<td></td>
