**SnapDry™**
**Interior-Exterior Waterbased Satin & Semi-Gloss**
A70B00100, A71B00100 Black, A70R00058, A71R00058 Real Red

**CHARACTERISTICS**
SnapDry™ Interior-Exterior Waterbased Door & Trim Paint is designed for use on doors, trim, windows, and shutters. SnapDry is resistant to dirt, fingerprints and UV weathering. With Quick Dry Technology, you can close doors sooner and not worry about it sticking.

**Color:** Package Black & Real Red
To optimize hide and color development, always use the recommended P-Shape primer

**Coverage:**
350-400 sq.ft.per gallon @ 4 mils wet; 1.3 mils dry
7.0 wet mils maximum per coat

**Drying Time, @ 77°F, 50% RH:**
- **Touch:** 1 Hour
- **Recoat:** 2 Hours
Drying and recoat times are temperature, humidity, and film thickness dependent

**Finish:** Satin 15-25 @60°
Semi-Gloss 45-55 @60°

**Tinting with CCE only:**
- **Base:** oz. per gallon
- **Strength:** 0-12 SherColor
Real Red
Do not tint Black
Black A70B00100 (may vary by color)

**V.O.C. (less exempt solvents):**
less than 50 grams per Litre; 0.42 lbs.per gallon
As per 40 CFR 59.406

**Volume Solids:** 31 ± 2%

**Weight Solids:** 35 ± 2%

**Weight per Gallon:** 8.69 lb

**Flash Point:** N/A

**Vehicle Type:** Acrylic latex

**Shelf Life:** 36 months unopened

**APPLICATION**
Surface, air, and substrate temperatures must be within a range of 50°F-90°F. Relative humidity must be between 40%-70%. Paints dry faster in higher temperatures, lower humidity, and when exposed to direct sunlight. When possible, paint in early morning or late afternoon. You may also be able to avoid direct sunlight while painting by opening the door into the home.

No reduction needed.

**Preferred Brush:** Purdy XL, Purdy Clearcut 2-2 1/2 inch

**Preferred Roller:** Purdy Jumbo Soft Woven 3/8 - 1/2 inch Contractor Series Mohair 3/16” inch

**Spray—Airless**
- **Pressure:** 1500-2000 p.s.i.
- **Tip:** .011-.015 inch

**APPLICATION TIPS**
Make sure product is completely agitated (mechanically or manually) before use.

When using SnapDry paint make sure any paint drips are smoothed out with a brush or roller within 5-10 minutes of application. If drips are noticed after 10 minutes of application, allow 1-2 hours to dry and use a putty knife or razor to remove the affected area. Lightly sand area if needed and repaint.

Allow SnapDry paint to dry before applying a second coat. When second coat is dry, remove all painter’s tape, re-install your door hardware. While making brush or roller strokes, make sure the fresh paint you are overlapping is still wet. This will help you to avoid paint streaks.

**Mildew Resistant**
This coating contains agents which inhibit the growth of mildew on the surface of this coating film.

**SPECIFICATIONS**
Apply 2 topcoats of SnapDry directly over existing properly prepared, interior or exterior coatings, or properly primed new interior or exterior surfaces as directed below.

**Interior:**
- Wood
  1 coat Premium Wall & Wood Primer
- Interior & Exterior
  Aluminum & Galvanized
  1 coat All Surface Latex Primer
- Steel
  1 coat All Surface Latex Primer

**Exterior:**
- Wood, Composition Board
  1 coat Exterior Oil-Based Wood Primer
  or Exterior Latex Wood Primer
- Plywood
  1 coat Exterior Latex Wood Primer

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

Due to the fast dry nature of SnapDry, all quick dry waterbased and alkyd primers (those stating to recoat in as little as 1 hour) should be allowed to dry a minimum of 4 hours in good drying conditions. All other primers, follow the primer recommendations.

**COMPLIANCE**
As of 02/27/2020, Complies with:
- OTC Yes
- OTC Phase II Yes
- SCAQMD Yes
- CARB Yes
- CARB SCM 2007 Yes
- Canada Yes
- LEED® v4 & v4.1 Emissions No
- LEED® v4 & v4.1 V.O.C. Yes
- EPD: NSF® Certified No
- MIR: Product Lens Certified No
- MPI® No

SnapDry™
Interior-Exterior Waterbased Satin & Semi-Gloss

**SURFACE PREPARATION**

**WARNING!** Remediation of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer.

**CAUTIONS**

Do not paint vinyl or other PVC Building Products.
Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

**CRISTALLINE SILICA:** Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (NIOSH approved) or leave the area. Adequate ventilation required when sanding or abrading the dried film. If inadequate ventilation cannot be provided wear an approved particulate respirator (NIOSH approved). Follow respirator manufacturer’s directions for respirator use. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE.** Abrading or sanding of the dry film may release crystalline silica which has been shown to cause lung damage and cancer under long term exposure. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

**CLEANUP INFORMATION**

Clean spills, splatters, hands and tools immediately after use with soap and warm water. After cleaning, flush spray equipment with compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer’s safety recommendations when using solvents.

---

**Mildew:**
Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised. Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting.

**Wood:**
Clean the surface thoroughly then sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler and sand smooth. All new and patched areas must be primed with appropriate primer. Exterior: Knots and some woods, such as redwood and cedar, contain a high amount of tannin, a colored wood extract. If applied to these bare woods, it may show some staining. If staining persists, spot prime severe areas with 1 coat of Exterior Oil-Based Wood Primer prior to using.

**Steel**
Remove all corrosion by abrading the surface. Prime bare steel the same day as cleaned with All Surface Enamel Latex Primer.

**Aluminum and Galvanized Steel**
Wash to remove any oil, grease, or other surface contamination. All corrosion must be removed with sandpaper, wire brush, or other abrading method. Prime with All Surface Enamel Latex Primer.
